No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                sequence 8, Assequence 48, Sequence 48, Sequence 53, Assequence 5, Assequence 5, Assequence 56, Assequence 56, Assequence 56, Assequence 56, Assequence 56, Assequence 50, Assequence 20,

N.Alternate names: calcium-binding protein 3

S.Specials: Rattus norwedgicus (Norway rat)

C.Specials: Rattus (Noryay M.; Baba, T.; Michikawa, Y.; Yamanobe, T.; Arai, K.; Okinaga, S. Exp. Cell Res. 205, 101-110, 1993

A.Yitle: An endoplasmic reticulum protein, calreticulin, is transported into the acrosom A.Reference number: A49176; MUID:93202172

-!- FUNCTION: THIS PROTEIN BINDS CALCIUM. THERE ARE BOTH HIGH AND
LOW AFFINITY CALCIUM BINDING SITES.

-!- SUBBUNIT: MONOMER (BY SIMILARITY).

-!- SUBGELLICHAR LOCATION: ENDOPLASMIC RETICULUM LUMEN.

-!- SUBCHILLAR LOCATION: ENDOPLASMIC RETICULUM FAMILY.

-!- SIMILARITY: BELONGS TO THE CALRETICULIN FAMILY.

-!- CAUTION: WAS ORIGINALLY (REF.2) THOUGHT TO BE THE RO AUTOANTIGEN.
                                                                                                                                                                                                                                                                                                MEDIINE-90380058; PubMed-2400400; Krause K. "Evidence for complex formation between rabbit lung flavin-containing monooxygenase and calreticulin.";

Biochemistry 30:8892-9900(1991).

-!- FUNCTION: THIS PROTEIN BINDS CALCIUM. THERE ARE BOTH HIGH AND LOW AFFINITY CALCIUM-BINDING SITES.

-!- SUBUNIT: MONOMER (BY SIMILARITY).

-!- SUBUNIT: BELONGS TO THE CALRETICULIN FAMILY.
Milner R.E., Baksh S., Shemanko C., Carpenter M.R., Smillie L., Vance J.E., Opsa M., Michalak M.; "Calreticulin, and not calsequestrin, is the major calcium binding protein of smooth muscle sarcoplasmic reticulum and liver endoplasmic
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Gaps
